Address: Nadiad, Gujarat, India

Language: English, Hindi, Gujarati

PROFESSIONAL SUMMARY

MERN Stack Developer with hands-on experience building scalable web applications using MongoDB, Express.js, React.js, and Node.js. Skilled in developing RESTful APIs, secure authentication, and performance optimization. Strong foundation in full-stack development, database management, and modern UI.

EDUCATION

Charotar University of Science and Technology
Bachelor of Computer Applications | CGPA:8.32

Changa, Anand, India
June 2021 - March 2024

SKILLS SUMMARY

- **Languages:** JavaScript, HTML, CSS, SQL
- **Frontend Libraries & Frameworks:** React.js, Redux, Material UI, Chakra UI, Bootstrap, Tailwind
- **Backend & Runtime:** Node.js, Express.js
- **Tools & Platforms:** Git, GitHub, NPM, Docker, Vercel, Figma, Photoshop
- **Soft Skills:** Communication, Problem Solving, Collaboration, Leadership

WORK EXPERIENCE

NodeJS Backend Developer | CyphersTechnolabs

January 2024 - March 2024

- **Architected scalable Node.js server-side applications**, ensuring a high-performance backend infrastructure capable of supporting dynamic business growth and complex requirements.
- **Designed and integrated RESTful APIs and MongoDB databases**, utilizing advanced indexing and query optimization to accelerate data retrieval and ensure seamless cross-platform exchange.
- **Implemented rigorous security protocols**, including state-of-the-art encryption and comprehensive security measures to safeguard sensitive data and maintain 100% system integrity.
- **Optimized system performance and UI/UX** through meticulous tuning and cross-functional collaboration with front-end teams, reducing latency and delivering superior user interfaces.

PROJECTS

STYLE LUST

February 2024 - March 2024

- Developed a MERN stack fashion recommendation web application using React.js, Node.js, Express.js, and MongoDB with secure authentication (JWT, hashed passwords, OTP).
- Implemented personalized outfit suggestions, direct shopping links, and admin management features with optimized data handling and performance.

GOFOOD

January 2024 - February 2024

- Developed a MERN stack food delivery web application with secure authentication, real-time order tracking, and Stripe payment integration.
- Built a responsive React.js interface and implemented MongoDB-based data storage for efficient order and user management.
